

Pitch Deck

Delivering happiness through
affordable energy solutions

PLP ASSIGNMENT

The Problem

No affordable power solutions for rural community members who resort to alternatives (Kerosene lamps and Candles) that are dangerous to the health

85 million Nigerians with no access to electricity (Energy Progress Report, 2024)

133 Million Nigeria lived on less than 1.90 USD (National Bureau of Statistics, 2022)

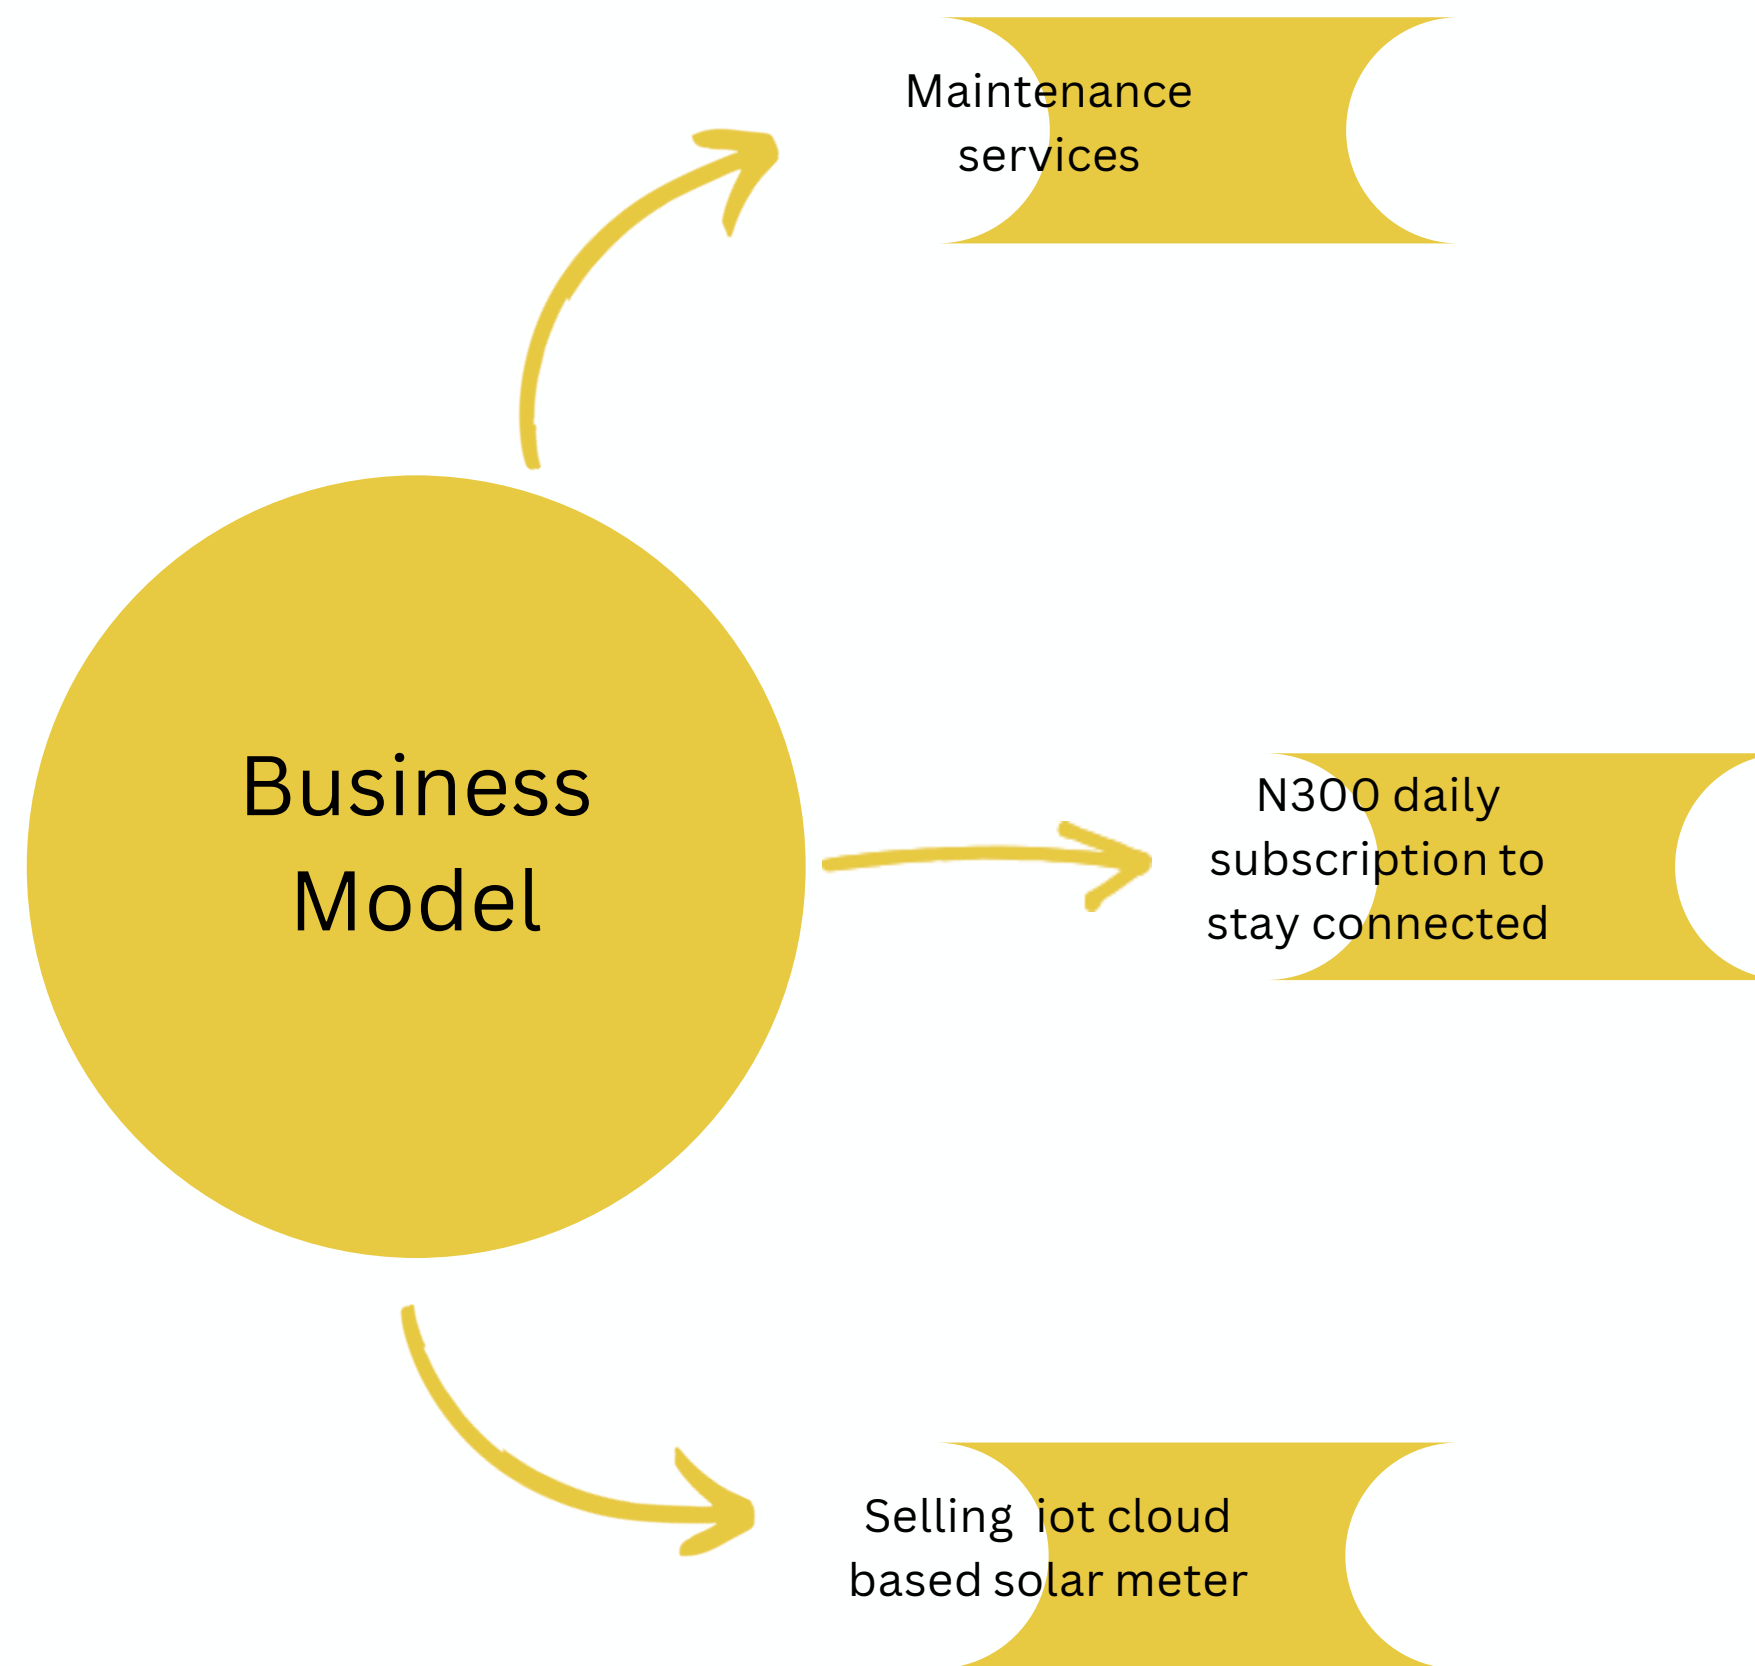

Our Solution

A cloud based solar mesh grid system designed for low income earners in rural communities

No pollution, kerosene lanterns, and candles.

Job creation for rural women while helping families saves over N324,500 annually.

Traction

- 01 Deployed first cloud based solar mesh grid in Anyamelum, Anambra State.
- 02 N400,000 in profit within 2 months while maintaining zero down time..
- 03 3 jobs created for rural women that manage our solar grid as light agents.

What we need from Plp

Capital to expand operations, procure solar accessories, and reach more households. (Our cloud based Solar Mesh Grid cost 4.5 million to install and each has the capacity to power 50 household.)

Seamless cloud payment and iot cloud integration to make daily subscriptions effortless for rural dwellers.

Guidance on scaling, operations, and sustainable business practices.

Training and support for rural women as light and MoMo agents to drive adoption and create livelihoods.
